Chua Zheng Hwan

Senior Frontend Developer | Angular | React |.Net Core |Building Web Apps

With 6 years of front-end development experience, I focus on building efficient, scalable, and well-structured projects that are easy to maintain and hand over to future developers.

I apply modern caching strategies and state management techniques to boost performance across both mobile and web platforms, while building reusable components and using tools like Lighthouse to ensure optimal application quality.

My backend experience in Singapore gave me hands-on involvement in API development and integration, which deepened my understanding of system architecture and helped me collaborate more effectively with backend teams.

I'm always eager to learn new technologies and continuously improve, believing that growth and collaboration are key to solving challenges and delivering high-quality, reliable results.

Employment History

Frontend Engineer at PWG ENTERPRISE — Malaysia, Bukit Bintang

JULY 2025 — JAN 2026

Overview: Collaborated with designers and backend developers to build a dating communication platform, implementing UI designs and integrating RESTful APIs with page logic.

Dating Communication Responsibilities:

- **AI Chatbot Development**: Built an intelligent chatbot system to track user intent and provide precise responses based on input. Implemented search filters by client name and ID, added pre-defined questions for quick user interaction, and integrated both AI voice response and voice-to-text input for a more natural user experience.
- **API Integration & Coordination**: Integrated RESTful APIs provided by the Hong Kong backend team, maintaining regular communication to clarify requirements, resolve issues, and optimize data exchange.
- **Application Enhancement**: Contributed ideas and best practices from previous project experience to improve usability, streamline workflows, and enhance overall application performance.
- **Tech Stack**: **React, Typescript, Tailwind CSS, TanStack Query, Postman, Vite, Shadcn UI.**

Professional Development

OCTOBER 2024 — JUNE 2025

MovieFlix (Self initial project):

- **Built a cross-platform mobile app**: with React Native and Expo, delivering smooth performance and a native-like experience across iOS and Android.
- **Integrated Appwrite BaaS and TMDB API:** to manage user activity, trending content, and real-time movie and TV data with dynamic search and filtering features.
- **Implemented responsive, modern UI:** using NativeWind with Tailwind-style utilities for fast development, consistent design, and optimized user engagement.
- **Tech Stack**: **React Native, Typescript, Tailwind CSS, Expo, NativeWind, Postman.**

mailto:terrychua93@gmail.com

Nationality: Malaysian

Driving license: Yes

Skills

React

Angular

.Net Core

SQL

Git & CI/CD

UI Framework

PostgreSQL

Tech Stacks

Frontend

REACT, REACT NATIVE, ANGULAR, UMIJS, TYPESCRIPT, ANT DESIGN, PRIMENG, ANGULAR MATERIAL, BOOTSTRAP JAVASCRIPT, TAILWIND CSS, CHARTS.JS, TANSTACK QUERY, NEXT.JS AND CHARTSJS

Backend

.NET CORE, SQL, POSTGRESQL, MICROSOFT SQL SERVER, REDIS CACHING, CRUD API, LINQ, ENTITY FRAMEWORK

Others Tools & Technologies

REACT REDUX, POWERSHELL, MVC MVP, POSTMAN, CI/CD PIPELINE, AGILE METHODOLOGY, DOCKER, GITHUB, GITLAB, AZURE DEVOPS

TCCV Resume (Self initial project):

- **Developed a personal resume website**: using Angular v19 with standalone components, ensuring modularity, scalability, and top-tier performance.
- **Enhanced UI consistency and responsiveness**: with Tailwind CSS utility classes, delivering a clean and adaptive design across devices.
- **Automated CI/CD pipelines**: via GitHub Actions and deployed to **Firebase Hosting** for fast, secure, and globally accessible delivery.
- **Tech Stack**: **Angular v19, Typescript, Tailwind CSS, CI/CD, GitHub Action, Firebase.**

Software Engineer at BIDOT TECH PTE LTD — Singapore, Raffles Place

OCTOBER 2023 — OCTOBER 2024

Overview: Collaborated on the development of a digital entertainment platform with secure payment integration, a powerful back-office system, and real-time data tracking. Build efficient RESTful APIs for seamless data retrieval and optimize database performance for high-speed transactions.

Digital Entertainment Responsibilities:

- **Payment Integration**: Implement a new gateway while ensuring strict compliance with client specifications, including structure, mandatory fields, and capitalization rules, with thorough testing for accuracy and reliability.
- **Back-Office Management**: Build a back-office system for real-time UI updates, user records, event management, data tracking dashboard for interactive insights and analytics.
- **API & Data Optimization**: Build scalable RESTful APIs and optimize SQL queries for maximum efficiency and performance. Optimize APIs and data by refining SQL queries, debugging, and removing unused tables or columns for better performance.
- **Tech Stack**: **.NET Core, React, SQL, Ant Design, Tailwind CSS, React Redux, REDIS Caching, Typescript, PostgreSQL.**

Software Engineer at CLOUD PLUS PTE LTD — Singapore, Tai Seng

MARCH 2022 — SEPTEMBER 2023

Overview: Specializing in healthcare and enterprise technology, I modernized legacy systems and streamlined operations. Participate in a team to transformation of hospital systems across Singapore into a unified platform, and upgraded JABIL 3.0 to enhance global supply chain management with real-time tracking and seamless supplier integration.

Dental Hospital System Responsibilities:

- **Legacy System Modernization**: Working with team to re-engineering of a legacy hospital system from Windows to a modern web application, consolidating processes across four major hospitals in Singapore into a unified platform to improve functionality, scalability, and user experience.
- **Data Harmonization**: Revised and harmonized the data flow across four hospital systems, designing ERD diagrams to ensure consistency and smooth migration. Collaborated to create a unified ERD, minimizing conflicts and ensuring seamless integration across all platforms.
- **Seamless Front-End/Back-End Integration**: Integrated front-end and back-end components using UmiJS, leveraging its routing and plugin system to optimize data flow, enhance scalability, and improve overall system performance.

Industry Experience

- Manufacturing & Supply Chain
- Healthcare
- Cloud Services & Secure Communication
- Real Estate
- E-Commerce

Languages

- English
- Chinese
- Malay

Education

Bachelor of Information Technology majoring in Security Technology at Multimedia University, Malacca

JUNE 2016 — SEPT 2019

CGPA: 2.8

Hobbies

In my free time, I enjoy staying updated on the latest IT news and exploring new technologies, regularly playing basketball, badminton, and running to maintain physical fitness.

Key Strengths

I am **diligent**, **innovative**, and **eager to learn**. I value **honesty**, **perseverance**, and a **strong work ethic**. I'm **self-motivated**, **dedicated**, and **committed** to delivering high-quality results.

- **RESTful API Development**: Designed and developed robust RESTful APIs, utilizing LINQ for efficient data retrieval, ensuring high-performance querying and seamless data integration across the system.
- **Tech Stack**: **.NET Core, UmiJS, React JS, SQL, Ant Design, Bootstrap JavaScript, Microsoft SQL Server, PowerShell.**

Jabil Supplier Management System Responsibilities:

- **System Enhancement:** Improved the Jabil Supplier Management System by developing new features that enhanced functionality, efficiency, and user experience.
- **Continent-Based Data Tracking:** Designed and implemented continent-based data tracking to provide better visibility and analytics across the global supply chain.
- **MVP Architecture Integration:** Integrated the Model-View-Presenter (MVP) pattern with Angular, strengthening code maintainability and scalability.
- **OAuth Cloud-Based Authentication:** Supported the implementation of OAuth-based cloud authentication to improve security and ensure compliance with data protection standards.
- **Tech Stack**: **Angular, Typescript, MVP, PrimeNG, Bootstrap v4, PostgreSQL, ECharts**

Frontend Developer to Senior Frontend Developer at LINKDOOD TECHNOLOGY SDN BHD — Malaysia, Melaka

MARCH 2019 — FEBRUARY 2022

Overview: Contributed to the development of a condo management and booking system for stays, facilities, and related services. Furthermore, to enhance an existing e-commerce focused on API and frontend integration to ensure smooth user experience, system reliability, and on-time project delivery.

Condo Management Responsibilities:

- **Led UI/UX enhancements:** by researching modern design trends and user feedback, implementing feature improvements that elevated usability and engagement.
- **Accelerated mobile app development:** through close collaboration with the backend team, optimizing frontend integration and resolving performance bottlenecks.
- **Optimized system performance:** by refining frontend architecture, improving responsiveness, and ensuring seamless API communication and reliability.
- **Conducted thorough testing and debugging:** to deliver a clean, high-quality interface aligned with design and business requirements.
- **International Collaboration:** Worked closely with the China-based team to align with their original e-commerce platform, updating UI components to maintain consistency before transitioning to the new system.
- **Tech Stack:** **Angular, Typescript, Bootstrap v4, Angular Material, ECharts, Charts.js.**

E-Commerce Platform Responsibilities:

- **International Collaboration:** Worked closely with the China-based team to align with their original e-commerce platform, updating UI components to maintain consistency before transitioning to the new system.
- **System Interaction & Revision:** Improved and maintained existing systems to ensure smooth transitions and reliable performance during updates.
- **API Integration:** Integrated and optimized APIs across multiple pages to ensure seamless data flow and functionality.

- **Tech Stack:** **Angular, Typescript, Bootstrap v4, Angular Material, Charts.js**
